SAGE Deep Backfiles

Benefits of subscribing to digital backfiles

• Access to journals from **Volume 1, Issue 1**
• **One time** payment
• Enjoy **content ownership** with upgrade opportunities and a minimal hosting fee
• Enable **anytime electronic access** to historical content that impacts today’s research
• **Save shelf space** and the cost of supporting a print collection in your library
Points consider when you choosing a Journal for article publication

• Does your research article fit the Journal aim, scope and area.

• The Journal should have good reputation in the field. Check for the editor and editorial board profile.

• What Journal do you read and cite often? Could they be good fits for your paper.

• Check for the Journal key matrix or indexing like Journal citation reports, SCOPUS, MEDLINE etc.

• What is the journal’s acceptance/rejection rate and publication speed?

• Who reads the journal (readership profile)? Will they be interested in your research?
How to Get Your Journal Article Published?

Helpful tips before article submission

• Read the journal’s aims and scope.

• Read the journal’s articles and TOCs on the SAGE Journals website to familiarize yourself with the content.

• You may wish to discuss your paper with the journal Editor.

• Beware of predatory publishers.

What should you do to prepare your manuscript?

• Read the manuscript submission guidelines. The SAGE website hosts manuscript submission guidelines for all of our journals.

• Make every effort to improve the quality of the manuscript before submission, ensuring the research is complete and the manuscript is well-written.

• Be as objective as possible about your work.
Manuscript submission Guidelines

- Article title, abstract and keywords – please refer to the information on how best to title your article, write your abstract and select your keywords by visiting SAGE’s Journal Author Gateway guidelines.

- Introduction with clear statement of purpose, literature review, hypotheses/research questions that are clear, meaningful, answerable, inter-related, and flow logically from the introduction.

- Should have methodology, appropriate sample, procedures/measures that offer enough information for replicability/trust, analysis and discussion – should be systematic and sensible.

- Tables and figures that speed comprehension, results, discussion of results, and key findings are also well defined.

- Conclusion: don’t merely repeat results, include directives of research and practice and awareness of limitations; don’t go beyond the evidence.

- Check has permission been obtained for use of copyrighted material from other sources (including the Web)?

- Proofread before submitting and provide a cover letter, Keep it short and highlight the salient features in the letter.

- Adhered to all forms of publication ethics, including listing authors and acknowledgments and disclosing any conflicts of interest?
➢ Be able to select the most appropriate journal for your research
➢ Understand how to successfully prepare your paper for submission
➢ Have confidence to navigate the peer review process
➢ Know what to expect from the publishing journey, from submission to publication
